WORK EXPERIENCE

Cybersecurity and Systems Engineering Technician

January 2026 — Present

Brooktec S.L.

Madrid, Spain

- Administration and **hardening** of Linux/macOS systems across internal and client infrastructure.
- Security monitoring and **incident response** with **SIEM (Wazuh)** and WAF protection (SOC operations).
- **Cloud security** auditing and validation across AWS, Azure and Google Cloud environments.
- Support to the implementation and maintenance of an **ISO 27001** ISMS (procedures, internal audits, GDPR).
- Black-box / white-box **penetration testing** on critical assets, reporting findings for remediation.
- Development of internal **AI-assisted tooling** (LLM-based) for infrastructure diagnostics and security operations.

Software Developer

September 2025 — January 2026

Brooktec S.L.

Madrid, Spain

- Development of mobile applications integrating **Artificial Intelligence** tools.
- Integration of **Cybersecurity** tools and protocols into **CI/CD** pipelines (DevSecOps).

Software Engineer / Developer

February 2025 — May 2025

Ongawa

Madrid, Spain

- Android climate-vulnerability app built with Kotlin and Jetpack Compose, applying Clean Architecture.
- Optimization of the team's version control workflow by introducing Git Flow.
- Project planning and tracking under SCRUM methodology.

Mobile Applications Developer

January 2023 — Present

Freelance

Remote

- Development and publication of applications on Google Play Store and App Store.
- Custom client solutions built with React Native, TypeScript and Firebase.
- End-to-end lifecycle management, from requirements gathering to publication.

EDUCATION

Professional Master in Cybersecurity Management, Ethical Hacking and Offensive Security International Business School

June 2025 — June 2026

EIP

Online

Bachelor's Degree in Computer Engineering

September 2021 — June 2025

Universidad Politécnica de Madrid

Madrid, Spain

RELEVANT PROJECTS

Wazuh AI Anomaly Detection & LLM Triage — Master's Thesis, open source

Two-stage system for the Wazuh SIEM: real-time unsupervised anomaly detection (PyTorch autoencoder, 0.1% measured false-positive rate) and SOC alert triage with a fully local LLM + RAG (Ollama, Qdrant). Docker-deployed and validated on production infrastructure. On GitHub: [wazuh-anomaly-detector](#) · [wazuh-llm-triage](#)

Mobile applications — Cross-platform apps built with React Native, TypeScript and Firebase, published on Google Play and App Store. More at sergarsilla.is-a.dev.

TECHNICAL SKILLS

- **Cybersecurity:** SIEM (Wazuh), Linux/macOS hardening, cloud security (AWS, Azure, GCP), WAF, vulnerability assessment (Burp Suite, Nmap, Metasploit), ISO 27001, GDPR
- **Systems & DevOps:** Linux, Docker, Bash, Git, CI/CD, DevSecOps
- **AI/ML:** PyTorch, local LLMs, RAG (Ollama, Qdrant)
- **Languages:** Python, Java, C, Kotlin, JavaScript/TypeScript, Elixir, SQL, LaTeX
- **Frameworks:** React, React Native, Node.js, Jetpack Compose
- **Architecture & Methodologies:** Clean Architecture, Domain-Driven Design, SCRUM, Git Flow

CERTIFICATIONS & LANGUAGES

IT Specialist — Network Security · AWS Academy Cloud Foundations · Harvard ManageMentor (leadership)

English: B2 level (TOEIC: 890/990) · **Spanish:** Native
