Education

Degree in Computer Engineering

Since September 2021 Universidad Politécnica Madrid, España

Science-focused High School

From September 2018 to May 2021 Colegio Mayol Toledo

Work experience

Software Engineer / Software Developer Intern

Since February 2025 Ongawa Madrid, MD, Spain

I have developed a climate vulnerability application at Ongawa as a Software Engineering / Developer Intern. Using Kotlin, MVC, Clean Architecture, and Domain Driven Design with Jetpack Compose for the UI, we built a robust solution to address climate vulnerability challenges. We also used GitLab with Git Flow for version control and SCRUM for effective teamwork and quality assurance.

Portfolio

My **work experience** and **main projects** are available in my online **portfolio**, where I showcase the work I have developed in various areas. You can visit it [here](#).

Computer skills

Java

C

MySQL, JDBC(Java DataBase Connector)

Development and management of RESTful APIs and web services

React

Node.js

Knowledge in operating systems, as well as distributed systems

Knowledge in engineering and development of software systems architecture

Cyber security

Bash

JavaScript, HTML y CSS

Python

IA Knowledge
